TRICUBES ENHANCES SECURITY LEVEL OF BAHRAIN CENTRAL INFORMATICS ORGANIZATION WITH SECUREXCESS SOLUTION

Date: Wednesday, 23rd March 2005

Bahrain – Tricubes Berhad, the leading biometric solution provider in Malaysia specializing in IT mobility and security, is providing an innovative solution in biometric secure access control - Tricubes SecureXcess - to Bahrain's Central Informatics Organization (CIO). Specially built with "all-in-one" features, Tricubes SecureXcess is integrated with a fingerprint biometrics system, contact-contactless smart card modules and flexible pin pad functionality thus turning all access rooms into highly secure restricted areas.

In conjunction with the 3rd Asia IT Ministers Summit & Showcase held at the Bahrain International Exhibition and Convention Centre, Tricubes, a recent MESDAQ listed company, signed an agreement with Al Jama Group, the company's local partner and representative in Bahrain yesterday. The agreement was signed after Al Jama successfully a contract with CIO for deploying and installing the Tricubes SecureXcess in their new building.

According to Dr. Raed Mohammed Shams, Director of Statistics of CIO, "CIO awarded the contract to Al Jama Group. CIO's new building now monitors the time attendance of its staff and keeps track of visitor registration to provide convenience to security personnel as well as visitors".

This new system will be able to leverage on the Nation's security efforts for the forthcoming Bahrain National ID Smart Card scheduled to be implemented this year.

The Al Jama Group is mainly involved in manufacturing doors for hotels, airports and other highly secured buildings. "By integrating Tricubes' solutions with their doors; we are able to provide a completely secure

access control system to CIO's new building," said Khairun Zainal Mokhtar, Chief Executive Officer of Tricubes Berhad.

According to Khairun, "The SecureXcess is undoubtedly the most highly secure and multi-featured component of any entire access control system. Designed to facilitate third-party application development, the SecureXcess multiple interfaces can be configured to integrate with virtually any back-end system seamlessly. In addition, the flexible interface protocol is also available for smooth system integration."

"In the wake of global terrorism activities and issues arising from identity fraud, we have positioned ourselves as a complete solution provider in the area of Secure Access and Authentication Solution (SAA) that provides solutions for detection and prevention to fight against terrorism for any organization and country," said Khairun.

Since 2003, Tricubes has deployed its products and services in Mobile Workforce Solution (MWS) and SAA to its clients ranging from small to large organizations and institutions in the financial, utilities, logistics as well as government sectors. Among the clients that successfully deployed and installed our Secure Biometric Door Access and Mobile Solutions are The Malaysian MyKAD Project, Lufthansa SkyChefs Brahim in the Kuala Lumpur International Airport, Hong Kong Smart ID Project, and Orly Airport, France for Secure Mobile Project.

About Al Jama Co.
